SUMMARY

Results-driven AI & Cloud Computing student with strong knowledge in Machine Learning, NLP, and AWS cloud services (EC2, S3). Skilled in Python and Java with hands-on experience in developing intelligent systems and cloud-based applications. Passionate about solving real-world problems and seeking an internship in AI/Cloud domain to enhance technical and problem-solving skills.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java
 - **Cloud Platforms:** AWS (EC2, S3)
 - **Tools:** Git, GitHub, Android Studio
 - **Technologies:** Machine Learning, Natural Language Processing (NLP), REST APIs
 - **Concepts:** Data Structures, Algorithms, Problem Solving
-

PROJECTS

Fake Medicine Detection System (Cloud-Based)

- Developed a cloud-based system to detect counterfeit medicines using batch ID and manufacturing data
- Implemented scalable storage solutions using AWS cloud services
- Improved data validation and detection accuracy using structured datasets
- Designed for real-world application in pharmaceutical safety

AI-Based Voice Assistant

- Developed a voice-controlled assistant using NLP techniques
- Integrated speech recognition and text-to-speech functionalities
- Automated user interaction with real-time responses
- Enhanced usability through hands-free system control

Cloud Computing Project (Microsoft Platform – Skill Vertex)

- Completed a hands-on project using Microsoft cloud technologies
 - Gained experience in cloud deployment, storage, and virtual services
 - Learned cloud architecture and resource management concepts
-

INTERNSHIP EXPERIENCE

Android Application Development Intern – NSIC

- Developed mobile applications using Java and Android Studio
- Designed user interfaces and implemented application logic
- Debugged applications and improved performance
- Gained practical exposure to the software development lifecycle

EDUCATION

B.E– Artificial Intelligence and Machine Learning

Paavai Engineering College

Pursuing (3rd Year)
